Dissertation with Latex

This isn't a Latex-help in the common sense. But it should help by some specific things around using Latex for writing a dissertation (PhD-Thesis) and other similar documents. The layouts correspond to the styles of the ETH and/or IACETH (the institute where I'm working), but it shouldn't be a problem to use other styles.

At Documents you will find some examples (which are still in German), which shows and explains the most things.

Computer specific things are related to UNIX/Linux, except of the Chapter about Windows.

- Preparation
- Structure of Latex files
- Special Chapters
- Create / Compilation
- Tips
- Define Latex Commands
- Windows specific tips
- Links
- Documents
