Documentation Graphics and Filetype icons

This is the Foswiki icon library. The graphics can be used in topics and by web applications.

Usage

Default notation:

> `%ICON{help}%` results in:
>
> Note that `ICON{}` assumes a GIF image of 16 x 16 pixels. Use a HTML `img` tag with `%ICONURL{}%` for image with other sizes. See the tables below for copy-paste examples.

Other usage: see below.

Usage (extended)

There are several other ways to put an image in a topic.

Shorthand notation:

In Main.SitePreferences!? set a macro for an ICON, for example:

```
* Set H = %ICON{help}%
```

Now you can use the icon by writing `%H%`

For extended use, check out Foswiki:Extensions.SmiliesPlugin that uses a different short hand than `%MACROS%`.

Full path:

In any topic, write `%PUBURL%/%SYSTEMWEB%/DocumentGraphics/help.gif` to show

You are not restricted to use the DocumentGraphics topic - in a similar way you can show attached images by replacing `DocumentGraphics` with the topic name.

To create an image with a link, write:

`[[WebHome][%ICON{home}% Home]]` to get: Home

To get rid of the underline under the space, write:
`[[WebHome][%ICON{home}%]] [[WebHome][Home]]` to get: Home

To get the full URL of the icon, use ICONURL:

`%ICONURL{"toggleopen"}%` gets you the image path:
`https://wiki.iac.ethz.ch/pub/System/DocumentGraphics/toggleopen.gif`
and that will get rendered as:
