DojoToolkitContrib Contrib Package

Summary of Contents

Contains an un-archived and ready for use copy of dojo toolkit 1.2.3 - see <http://dojotoolkit.org/>

Documentation

see the The Dojo Book

Usage

This Contrib is a convenience package, and should be used in conjunction with another Foswiki Extension - such as Foswiki:Extensions.RestPlugin.

It contains one function

`Foswiki::Contrib::DojoToolkitContrib::requireJS(dojoModuleName)`, that will add the `dojo.js` script to the HTML header, and add the `=dojo.require` calls in order.

Settings

Settings are stored as preferences variables. To reference a setting write `%<plugin>_<setting>%`, e.g. `%DOJOTOOLKITCONTRIB_STUB%`

- One line description:
 - ◆ Set SHORTDESCRIPTION = Adds Dojo Toolkit javascript to Foswiki.
- Name of the perl package
 - ◆ Set STUB = %\$STUB%

Updating instructions

If you're going to update the version of Dojo in the contrib, please use the following command in the `DojoToolkitContrib/pub/Foswiki/%TOPIC/` directory

- `find . \! -regex '.*\.svn.*' -exec rm '{}' \;` (this will remove all the existing files from your checkout)
- `tar zxvf /Users/sven/Desktop/dojo-release-1.1.0.tar.gz`
- if the untar created a new directory 🌀 move the contents up on, to overlay the original Foswiki files
- `svn rm` the files that are missing (these have been removed from the latest release. (`svn stat | sed 's/!/svn rm/' | sh`)
- `svn add` the files that are new. (`svn stat | sed 's/?/svn add/' | sh`)
- update the MANIFEST (`find pub ! -wholename '*.svn*' >> lib/Foswiki/Contrib/DojoToolkitContrib/MANIFEST`)
- commit the new versions

Installation Instructions

- Download the ZIP file from the Plugin web (see below)

Unzip `DojoToolkitContrib.zip` in your Foswiki installation directory. Content:
