Chili is the jQuery code highlighter plugin.

Features:

- Very fast highlighting, trivial setup, fully customizable, thoroughly documented, and MIT licensed
- Renders identically on IE, Firefox, Mozilla, Opera, and Safari
- Comes bundled with recipes for C++, C#, CSS, Delphi, Java, JavaScript, LotusScript, MySQL, PHP, and XHTML
- Many configuration options: Static, Dynamic, Automatic, Manual, Ad-Hoc, with Metaobjects.
- Provides fine control over which elements get highlighted by means of a jQuery selector or the mythical jQuery chainability.
- Fully supports javascript regular expressions, including backreferences
- The replacement format gives full control on what HTML is used for highlighting
- Provides examples which show setups and features
