JQueryFarbtastic

Homepage: http://acko.net/dev/farbtastic
Author(s): Steven Wittens
Version: 1.2

Farbtastic is a jQuery plug-in that can add one or more color picker widgets into a page. Each widget is then linked to an existing element (e.g. a text field) and will update the element's value when a color is selected. Farbtastic uses layered transparent PNGs to render a saturation/luminance gradient inside of a hue circle. No Flash or pixel-sized divs are used.

There's a `color` formfield for easy integration into Foswiki DataForms.

Usage

Add the class **`jqFarbtastic`** to an input element that you want to attach the color selector to. The widget can be parametrized using metadata inside the class attribute.

Color Formfield

With the farbtastic plugin comes a formfield type `=color` that lets you add one or more color formfields to DataForms. Try

Name	Type	Size	Values	Tooltip message	Attributes
Color1	color	10			
Color2	color	10			
Color3	color	10			
Color4	color	10			

To define a PaletteForm with 4 colors.
