JQueryGrid

Homepage: <http://www.trirand.com/blog/>

Author(s): Tony Tomov

Version: 3.6.3

jqGrid is an Ajax-enabled JavaScript control that provides solutions for representing and manipulating tabular data on the web. Since the grid is a client-side solution loading data dynamically through Ajax callbacks, it can be integrated with any server-side technology, including PHP, ASP, Java Servlets, JSP, ColdFusion, and Perl. For more read the [jqgrid docs](#).

Examples

```
%GRID{ form="System.UserForm" web="Main"
columns="Topic,FirstName,LastName,Organization,Country,Telephone" rows="30" filterbar="on"
rownumbers="on" width="auto" height="auto" }%
```
