JQueryTabpane

Homepage: http://michaeldaumconsutling.com
Author(s): Michael Daum
Version: 1.1

This implements an alternative tabpane widget. There *is* already one in jquery-ui, however as long as jquery-ui is still in flux, this alternative offers a safe substitute well integrated into Foswiki.

Individual tabs can be loaded on demand using a REST call. Installing is recommended for that.

Tabpanes can be nested. Tabs can be extended in height automatically. Heights can be auto-updated to follow windows resize events. Tabpanes can be established as part of reloaded content via ajax.

Note that this widget does *not* participate in jquery-ui themerolling. It does match JQueryButton in terms of look & feel.
