TWikiCompatibilityPlugin

add TWiki personality to Foswiki

Usage

Automatically maps requests for legacy TWiki web topics to Foswiki free topics as per TopicNameMappingTable.

Map TWIKIWEB to SYSTEMWEB and MAINWEB to USERSWEB - no Preference settings required.

to add similar auto-compatibility for attachments, add (or uncomment) the following ErrorDocument? handling to your Apache configuration *in the pub section*

```
#for TWikiCompatibility
ErrorDocument 404 /foswiki/bin/viewfile
```

TODO:

1. pub file redirection - will probably have to be a final regex in postRendering

Installation Instructions

You do not need to install anything in the browser to use this extension. The following instructions are for the administrator who installs the extension on the server.

Open configure, and open the "Extensions" section. Use "Find More Extensions" to get a list of available extensions. Select "Install".

If you have any problems, or if the extension isn't available in `configure`, then you can still install manually from the command-line. See <http://foswiki.org/Support/ManuallyInstallingExtensions> for more help.

Plugin Info

Many thanks to the following sponsors for supporting this work:
