Control table attributes with TablePlugin

The TablePlugin gives extra control of table display:

- Allows sorting
- Changing table properties like border width, cell spacing and cell padding
- Changing background color and text color for header cells
- Changing background color and text color for data cells - colors can *alternate*
- Table attributes can be set and overridden in this order:
 - ◆ Default TABLEATTRIBUTES Plugin setting in this topic
 - ◆ A TABLEATTRIBUTES preferences setting on site-level (SitePreferences), web-level (any WebPreferences), or topic level. For example:
◊ Set TABLEATTRIBUTES = tableborder="0" cellpadding="1" ...

To change table characteristics place %TABLE{ . . . }% before the table.
