#VarSUBSCRIBE

SUBSCRIBE{ *attributes* } - subscribe the current user for notification of changes to the current topic

Anywhere in a topic or template:

- %SUBSCRIBE{ . . . }% or simply %SUBSCRIBE%

Parameter	Default	Meaning
format	Simple HTML Link with an action anchor "Subscribe" or "Unsubscribe"	Defines custom look-and-feel for subscribe link using the following format variables: \$topics, \$url, \$wikiname, \$action
unsubscribe	Not set	If set to "on", will unsubscribe the user
formatunsubscribe	format	Serves same function as format, but allows the user to define a different format than subscribe.
topic	Current topic	Topic to subscribe to. Wildcards may be used e.g. topic="Item*" will subscribe to all topics starting with Item. Use topic="Main.*" to subscribe to the WebNotify for that web.
who	Logged-in user	Who to subscribe (wikiname, no web)

- The button toggles subscribe/unsubscribe if the user is already subscribed or vice versa. So after the next click on the button, the user will be unsubscribed.
- The plugin will do the best it can to optimise the subscription lists in WebNotify.
