Add-Ons

Add functionality with extensions not based on the Foswiki scripts.

Overview

An add-on runs separately from the Foswiki scripts, e.g. for data import, export to static HTML, etc. Add-Ons normally do not call any Foswiki code directly, though may invoke Foswiki scripts. There are different types of add-ons, they may be stand alone scripts, browser plugins, office tool extensions, or even a set of topics that form a wiki application.

See **other types of extensions**: Contribs, Plugins, Skins

Add-Ons Installed on this site

Number of topics: 0

Installing Add-Ons

- Download an add-on from Foswiki:Extensions.AddOnPackage.
- Follow the installation instructions in the add-on topic.

Creating new Add-Ons

- Visit Foswiki:Extensions.AddOnPackageHowTo and follow the instructions.
